Course: APSY504

Title: Cognitive Psychology I

Learning Objectives:

1. To ensure understanding of the fundamental concepts of cognitive psychology and the basic cognitive processes.
2. To provide a balanced knowledge base of theory and research in cognitive psychology
3. To highlight the neuropsychological basis of cognition.
4. To develop critical thinking and application skills with respect to the subject matter of cognitive psychology and life in general.
5. To create a foundation for higher education and a career in cognitive psychology.
6. To introduce students to the link between cognitive psychology and personality.

Number of lectures: 60

**UNIT 1 AN INTRODUCTION TO COGNITIVE PSYCHOLOGY AND
NEUROCOGNITION (15 lectures)**

- Definitions of Cognition, Cognitive Psychology. Cognitive Science
- History of Cognitive Psychology
- The Cognitive Revolution and Current Trends
- Paradigms of Cognitive Psychology
- Research Methods in Cognitive Psychology
- Structure of the Brain - Basic Anatomy
- Basic Neurology
- Localization and lateralization of Function
- Brain Imaging techniques

UNIT 2 FORMING AND USING NEW MEMORY TRACES (15 lectures)

- Metaphors of Memory
- Sensory Memory
- Short Term Memory
- Working Memory and Executive Functioning
- Neurological Studies of Memory Processes

**UNIT 3 RETRIEVING MEMORY FROM LONG TERM STORAGE
(15 lectures)**

- Taxonomy of LTM
- Mnemonic Devices

- The Traditional View of LTM
- The Levels of Processing View
- Amnesia

UNIT 4 MEMORY FOR GENERAL KNOWLEDGE (15 lectures)

- The Semantic – Episodic Distinction
- Semantic Memory Models
- Implicit v/s Explicit Memory
- Schemata, Scripts, and the Propositional Approach
- Bandura’s Social Cognitive Theory

APSY606 Action Oriented Counseling (revised in 2018)

TYBA

Course: APSY601

Title: Psychometrics and Statistics II

Learning Objectives:

1. To ensure understanding of the nature, uses, technical features, and process of
2. construction of psychological tests
3. To highlight the distinction between testing and assessment
4. To facilitate awareness of the application of psychometrics to intelligence
5. To develop skills in the uses and applications of statistics to the behavioral sciences
6. To create a foundation for advanced learning of psychological testing, assessment, and statistics
7. To introduce students to the link between psychometrics and personality

Number of lectures: 60

UNIT 1

1. Test Development

(15 lectures)

- Test conceptualization
- Test construction
- Test tryout
- Item analysis
- Test revision

UNIT 2

2. Measurement of Intelligence (15 lectures)

- Definitions of Intelligence
- Theories of Intelligence
- The Stanford-Binet Intelligence Scales
- The Wechsler Tests of Intelligence

UNIT 3

3. Assessment of Personality (15 lectures)

- Definitions of Personality
- Trait Theories of Personality
- Approaches to Personality Assessment
- Projective methods of Personality Assessment

UNIT 4

(15 lectures)

4. Normal Distribution, Inference and Correlation

- Characteristics, importance and applications of the Normal Distribution
- Areas under the Standard Normal Curve and Z-scores
- Basics of Statistical Inference
- The t distribution and its uses in tests of hypothesis
- Correlations (scatter grams, types, calculation, interpretation, limitations)

Title: Abnormal Psychology II

Learning Objectives:

1. To ensure understanding of important concepts of abnormal psychology.
2. To acquaint students with classic and contemporary theories and issues in abnormal psychology.
3. To impart knowledge and understanding of the different psychological disorders with respect to symptoms, diagnosis, causes and treatment.
4. To increase awareness about mental health problems in society.
5. To understand the issues related to diagnosis and labelling.
6. To introduce students to the link between abnormal psychology and personality.
7. To create a foundation for higher education and a professional career in clinical psychology.

Number of lectures: 60

UNIT 1. DEVELOPMENTAL & COGNITIVE DISORDERS (15 lectures)

- Pervasive developmental disorders (Autism Aspergers, Mental Retardation, Learning disabilities)
- Anxiety disorders (Separation Anxiety Encopresis, Enuresis, Selective Mutism Tics)
- Other disorders (ADHD, ODD, Conduct disorder)
- Cognitive disorders (Dementia, Parkinson's, Alzheimer's)
- Inclusion (Disability Act 2016, Maharashtra)

UNIT 2. SOMATOFORM & PERSONALITY DISORDERS (15 lectures)

- Nature and types of somatoform disorders
- Causes
- Types of personality disorders (Cluster A, Cluster-B, Cluster-C)

UNIT 3. MOOD DISORDERS & SUICIDE (15 lectures)

- Types (Unipolar disorders, Bipolar disorders)
- Depressions not classified as mood disorders
- Theories & specifiers of depression
- Causal factors of mood disorders
- Suicide (types, causes, interventions, gender differences)

UNIT 4. OVERVIEW OF TREATMENT & ISSUES (15 lectures)

- Pharmacological approaches
- Psychological approaches with emphasis on Carl Rogers's theory of personality
- Deinstitutionalization v/s Homelessness
- Legal issues (The JJBACT 2015 India, commitment, assessment of dangerousness)
- Contemporary issues (The Insanity Defence NGRI v/s GBMI)
- The Mental Health Bill (2016)
